**CHARLESTON or LARGE WAKEFIELD**

### **COPENHAGEN MARKET**

A fine Cabbage. This variety is nearly as early as Jersey Wakefield. The stem is short, and the large, round, solid head has few outer leaves. My stock of this popular variety is extra early, uniform and dependable. A round head, weighing 3 to 3½ pounds, produces headed Cabbage 66 days after plants are set out.

### **GOLDEN ACRE**

66 days. The earliest round-headed Cabbage, especially valuable for early market and shipping. Plants very small and compact; stem short; heads uniformly round, firm, commonly 6 inches in diameter and weighing 3 pounds. This is similar to Copenhagen Market but is several days earlier and the heads are smaller. It is practically as early as Early Jersey Wakefield.

### **FERRY'S ROUND DUTCH**

71 days. Splendid for home and market garden. Plants small and compact; stem short. Heads almost ball-shaped, commonly 7 to 8 inches in diameter and 6 inches deep, weighing 4½ to 5 pounds. Firm and of high quality. Slow to produce "seeders."

### **GLORY OF ENKHUIZEN**

76 days. Attractive, round, solid heads, 7 to 8 in. in diameter, and weighing from 5 to 6 lbs. each. They are exceptionally firm and solid. Leaves are finely ribbed, exceedingly tender and of remarkably fine flavor. Makes excellent kraut, slaw, etc.

Due to the occasional severe weather in Georgia we maintain a plant growing station in Palatka, Florida, to assure you of plants. We will ship your order for plants from the station that has the best plants at the time your order is wanted.

**Send All Orders to Tifton, Georgia**

# *Fulwood's*

## **Frost-Proof CABBAGE PLANTS**

**Guaranteed to be reasonably free of  
aphides and diseases.**

**Ready September 1 to June 15**

### **CHARLESTON or LARGE WAKEFIELD**

71 days. Desirable for home and market garden. Head broad heart-shaped, 8 inches broad at base, firm, commonly weighing 4 to 5 pounds. Fully a week later; heads larger and broader heart-shaped than Early Jersey Wakefield.

The return C.O.D. charges are so high we had to discontinue shipping C.O.D. parcel post. Send check or money order for the amount of plants wanted as our parcel post prices quoted are delivered prices.

### **PRICES ON CABBAGE PLANTS**

*Cabbage Plants tied 50 to bundle*

*Shipping weight, 18 lbs. to 1,000 plants*

The minimum express charges are \$1.50. When ordering less than two thousand plants it would probably be cheaper to ship them by parcel post.

**PARCEL POST PAID TO YOUR DOOR. NOTHING ELSE TO PAY.**

**GOLDEN ACRE**

### **CULTURE — CABBAGE PLANTS**

These are frost-proof plants and should stand a temperature of 20 degrees or below. Requires about 12 thousand plants to plant one acre and use from one to two thousand pounds of 4-8-6 fertilizer to an acre. Plant in 3 ft. rows, from fourteen to twenty-four inches in the drill. They should be planted up to the bud, but do not cover the bud. Water and press the soil firmly around the plants. Use Sabadilla dust for control of Harlequin bugs. Use five per cent DDT Dust for all types of Cabbage worms.

## YELLOWS-RESISTANT VARIETIES CABBAGE PLANTS

SEE PAGE 2 FOR PRICES AND CULTURE ON CABBAGE PLANTS

**MARION MARKET**

**WISCONSIN ALL-SEASON**

Due to the occasional severe weather in Georgia we maintain a plant growing station at Palatka, Florida, to assure you of plants. We will ship your order for plants from the station that has the best plants at the time your order is received.

Send all orders to Tifton, Georgia.

**RESISTANT DETROIT**—68 days. Introduced as an excellent yellows-resistant strain of Golden Acre. Very popular for early markets.

### MARION MARKET

This is also offered as Wisconsin Copenhagen and is a very important midseason yellows-resistant variety for kraut manufacture and market. This variety has prominent globular heads which approach those of Glory of Enkhuizen in size, and it produces a heavy yield on yellows-infested soil where ordinary varieties fail. Matures heads 70 days after plants are set out. Somewhat larger than Copenhagen, but the same shape.

### MEDIUM COPENHAGEN

73 days. Developed to meet the need for a later and larger headed type than the regular Golden Acre and Early Copenhagen Market. Yellows Resistance makes this an important market and shipping cabbage. Heads uniformly round, firm and bluish-green in color.

### GLOBE

80 days. A Yellows Resistant strain of the Glory of Enkhuizen type.

### WISCONSIN ALL-SEASON

This is a yellows-resistant strain developed at the Wisconsin Experiment Station by selection of healthy plants of standard All-Season grown on infested land. Wisconsin All-Season is a very valuable, heavily productive, hard-headed variety of particular merit for use in yellows-infested localities, and it is well adapted for kraut and for winter use. Makes heads in 90 days, weighing 6 to 8 pounds.

Please send remittance along with your order as all parcel post prices quoted are postpaid.

ANYONE WISHING TO CONTRACT FOR CABBAGE OR TOMATO PLANTS IN LOTS OF HALF MILLION OR MORE AND BE ASSURED OF GETTING YOUR PLANTS AT A PARTICULAR TIME, WRITE US AT OUR TIFTON, GEORGIA, FARM FOR SPECIAL PRICES.

# FULWOOD'S ONION PLANTS

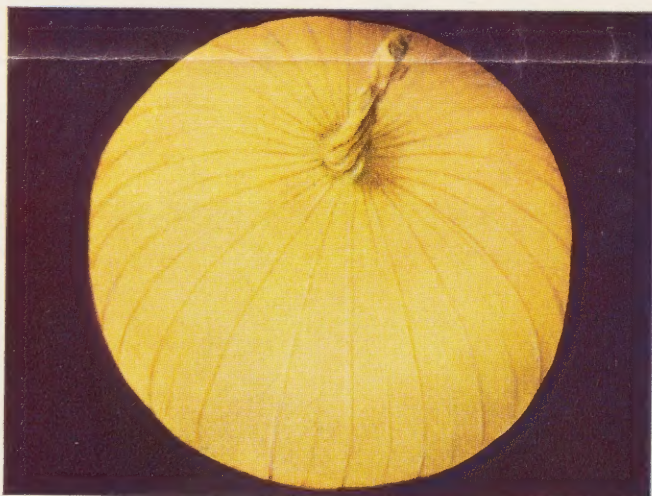

## *Genuine* FROST-PROOF

*Ready September 1 to June 1*

### CRYSTAL WAX BERMUDA

Probably the best-selling Bermuda Onion on the market, because of its exceptionally attractive appearance. It looks much like the Yellow Bermuda except that it is crystal white and waxy. Because of its sweet, mild flavor, like the Yellow Bermuda, this is an excellent eating Onion.

### YELLOW BERMUDA

This is the most widely planted of all Bermuda Onions. No sweeter Onion is grown than this, and it always has a ready market. It is a large producer and a real money-maker. Whether grown for marketing or for your own table, you can make no mistake in ordering this variety.

Southern-grown Onion plants are no longer an experiment. Large quantities are set out every year and they are rapidly displacing sets. They will grow large, sweet Onions early, and are good keepers. They produce Onions two to three times larger than sets, and seldom run to seed. They can be set early, the same time you would put out sets or cabbage plants. Therefore, we strongly advise you to use our plants instead of sets, whether for the market or home use. Our Onion plants are grown from the very best seed, and will be found true to name. These Onion plants should be set out at the same time as cabbage plants, and you can order them for shipment at the same time.

Most Onion plant growers pull Onion plants ahead and store them several weeks before shipping. Such plants cannot produce good crops. Our plants are fresh pulled and shipped the same day and produce better crops.

### SWEET SPANISH

The best of the very large mild varieties. One of the original Spanish types, but a better keeper because it was selected for keeping qualities. Deep amber-orange; small neck; globular.

A bunch of 100 Onion Plants  
ready for shipping.

### How to Grow and Care for Onion Plants

These are frost-proof and can stand temperatures below twenty degrees. Plant approximately sixty thousand plants to an acre in 1½ ft. rows, three to four inches in the drill and about two inches deep. Water and press soil tightly around plants. Dust with 5% DDT for thrips.

Due to the occasional severe weather in Georgia we maintain a plant growing station at Palatka, Florida, to assure you of plants. We will ship your order for plants from the station that has the best plants at the time your order is received.

Send all orders to Tifton, Georgia

Hotbed grown Sweet Potato Plants from March 1st to May 1st.

Please send remittance along with your order as all parcel post prices quoted are postpaid.

## CULTURE—BUNCH PORTO RICO SWEET POTATO PLANTS

They should be planted after danger of frost. Use about 800 to 1,000 pounds of 4-8-8 per acre. Plant in 3½-foot rows, 12 inches to the drill, and use approximately twelve thousand plants to plant an acre. They should be on a six- or eight-inch bed. These Bunch Porto Rico Sweet Potato Plants can be cultivated without turning vines and they can be dug without having to cut vines, thus saving about fifty percent of the labor. Follow crop rotation.

References: Dun & Bradstreet, Inc., The Blue Book, The Red Book, The Bank of Tifton.

## PRICES ON BUNCH PORTO RICO SWEET POTATO SEED

**Ready Jan. 1st to April 1st**

**By Express, F O B Tifton**

**Bedding size . . . . . \$7.00 per bushel crate**

Sweet potato seed should be ordered only a week or ten days before ready to put in a hot bed. They are shipped in bushel crates and shipment can be made at any time up to April 1st. After that time we will bed all seed not sold. We highly recommend that you bed some of these Bunch Porto Rico Sweet Potatoes.

## INSTRUCTIONS FOR BEDDING FULWOOD'S IMPROVED SWEET POTATOES

One bushel of potatoes should pull one thousand plants each pulling for about three consecutive pullings. Choose a well-drained piece of soil on the south side of a building where the sun can hit it all day. Mix approximately three pounds of commercial fertilizer to each square yard of dirt. Place the potatoes far enough apart that they do not touch and cover them with some three to four inches of soil. Keep them moist but not too wet as excessive water makes them cold. You should get your first pulling in approximately six weeks, depending on the weather.

If you desire to make a hot bed for extra early plants write the Georgia Agricultural Extension Service, University of Georgia, at Athens, Georgia, for bulletin No. 533.

Our new Bunch Porto Rico Sweet Potato Seed are State inspected, free from disease and certified for shipping to all parts of the country.

This variety was tested out by the Georgia Coastal Plain Experiment Station here at Tifton. In 1948 they produced 747.38 bushels of Bunch Porto Rico Sweet Potatoes on a measured acre under ideal growing conditions. Over an eight-year period these potatoes averaged 374.8 bushels per acre, or 62.83 bushels per acre more than the Vining (Unit 1) Porto Rico.

It has no vines but grows straight up, making digging and cultivation easier. This variety is easy to make live and will produce a marketable crop of potatoes about three weeks earlier than the regular vine Porto Rico.

The Bunch Porto Rico Sweet Potato is a short, chunky, Copper Skin Potato with a red meat and has an exceptionally high sugar content and is excellent for table use. This potato keeps better than most potatoes, and in a very short time will be the leading sweet potato grown.

## SATISFACTORY DELIVERY

Some people hesitate to order plants from a distance, because they are afraid that tender plants cannot be delivered in good condition. We have shipped our plants successfully for many years all over the United States. We have satisfied customers in every state. We guarantee to deliver the plants you order in perfect condition. If you are not satisfied on delivery, we will replace your order. See our guarantee on page 12.

## CALIFORNIA WONDER (Sweet) PEPPER

This is an outstanding medium large variety for market garden and shipping. Plants vigorous and prolific. Fruits four-lobed, chunky, very attractive, smooth, uniform deep green, changing to bright crimson. Flesh thicker than any other variety, sweet and mild. Our stock is definitely superior.

*Not Frost-Proof. Ready April 1st to June 15th*

Please send all orders to P. D. Fulwood Company, Tifton, Georgia  
**CULTURE — PEPPER PLANTS.** Will not stand frost. Should be planted in 3 ft. rows, twenty-four inches apart. Use approximately seven thousand plants to an acre. Peppers, as a rule, are not bothered seriously by insects.

### CULTURE — EGGPLANT PLANTS

Will not stand any frost. Should be planted in 3 ft. rows, twenty-four inches in the drill. Requires approximately seven thousand plants to plant one acre. For the control of insects and diseases use the same material that is recommended for Tomatoes.

**PLANTING NOTES:** When plants arrive, if your ground is not in condition to plant right away, take the plants out of the crate, cut the bands, spread out and place the roots in soft mud. In planting, pack soil well around the roots, pouring water in the hole after the plants are set out. Throw loose dirt around the plants after watering to keep the wet soil from drying out. Use chart below for proper spacing.

## PLANTING CHART

Fulwood's Vegetable Plants	Hardiness as to cold	Width of row in feet	Distance apart in drill in inches	Plants to set 100 to 150 ft. of row	Plants to set one acre

Correct Depth for Planting Onion, Tomato and Cabbage Plants

# FULWOOD'S *Certified* TOMATO PLANTS

Telephone—Day 293, Night 678-J

**READY**

**MARCH 15th to JUNE 15th**

Prices and varieties of tomato plants on back of this page.

Due to the occasional severe weather in Georgia we maintain a plant growing station at Palatka, Florida, to assure you of plants. We will ship your order from the station that has the best plants at the time your order is wanted. Send all orders to Tifton, Georgia.

Tomato Plants are shipped from our Palatka, Florida, Farm from March 1st until April 1st. These plants are also State Inspected and Certified by the State of Florida.

## BEST CERTIFIED PLANTS GROWN FROM BEST CERTIFIED SEED

Our Tomato plants, grown on new land from Certified seed, are certified by the State of Georgia. We grow each season four hundred acres of Tomato plants. They are grown in the open field and when shipped are 8 to 10 inches tall; they are field hardened, stocky, and well rooted. Each bundle of 100 is wrapped with paper to hold the damp moss to the roots. They are then packed in special crates or hampers and shipped by express, and will keep in good condition six to ten days. These plants are not frost-proof and should not be planted until danger of frost is over.

## USE FULWOOD'S TOMATO PLANTS AND HAVE RIPE TOMATOES THREE WEEKS EARLIER THAN FROM HOME GROWN PLANTS

The fact that the seed is planted here in February and March gives the plants a chance to become acclimated and toughened by outside temperatures. When set farther North they will start growing quickly and produce rich, red, ripe Tomatoes three weeks before home-grown or hothouse plants. We ship these plants to every part of the United States, and have been shipping large quantities to market gardeners and truckers for forty-four years. Van Camp Packing Co., of Indianapolis, Ind., uses ten million of our Tomato plants every season. Send us your order for some of these fine plants. You will be more than pleased with the early profitable crop they will produce.

## MOST POPULAR VARIETIES FOR SHIPPING HOME GARDENS AND CANNING

**VALIANT** Adapted to short-season areas and the early market. Plant sparse and open; fruits large for an early variety, globe shaped and of bright scarlet color.

**MARGLOBE** is a splendid type for earliness and uniformity. It is particularly valuable for shipping; definite disease-resistance recommends it for use in sections infested with fusarium wilt and nail-head rust. Plants thrifty and heavily productive bearing over a long period. Fruits uniform deep scarlet, large, globe shaped; smooth, solid and of distinct quality.

**RUTGERS** An excellent all-purpose variety of wide adaptation. Plant large and prolific with thick stems and vigorous growth; partially resistant to fusarium wilt. Fruits globular, bright red, smooth, with thick walls and small seed cells.

**THE F2 HYBRID STOKECROSS \*NO. 5** Production increase up to 30% is not unusual. Due to its early maturing and a continuing harvest of large, smooth-shouldered fruit, the picking season is extended by at least two weeks. It has high color and rich flavor and it has proven to be extremely profitable on the green wrap and climax basket markets.

**CULTURE — TOMATO PLANTS.** Will not stand any frost. Should be planted in 4-foot rows, thirty-six inches apart and use about 3,500 plants to an acre. They should be planted up to the first heavy stem or leaf. For control of early and late blight use Dithane Z-78. For control of any insects use DDT, Calcium Arsenate or Lead Arsenate. For applying follow directions on containers.

A bundle of 50 Tomato Plants ready to be shipped.

## GUARANTEE

### 44 Years of Satisfactory Service

We guarantee all of our plants to be exactly as described in this catalog. Fresh pulled day order is received. Plants pulled approximately 50 to bundle and packed to carry to your home in good condition. Any plants arriving in bad condition will be reshipped at once, provided you notify us within five days. When you purchase Fulwood's plants you will receive full count, no runts, no diseased plants. We grow our plants from the very best seed obtainable. Nearly all of our seed are bought from the well known seed firm of Ferry-Morse Seed Company.

We send you only the highest quality plants and gladly stand back of them. However, weather, soil, and care also influence crops, so in no case shall we be responsible for any amount beyond the purchase price.
